使用说明

六级写作基本要求： 30 分钟，150–200 词，满分 106.5 分（占总分 15%）。近年以**议论文**为主，最常见的问法是“谈谈 X 的重要性/意义并说明如何做到”、“大学生应如何应对……”、“解释某句话/某现象”。 近两次真题话题：2025 年 12 月第三套“大学生应更好地准备以应对大学中的多样化挑战”；2026 年 6 月第一套“传统文化帮助培养文化自信”。（见范文 E1、E2）

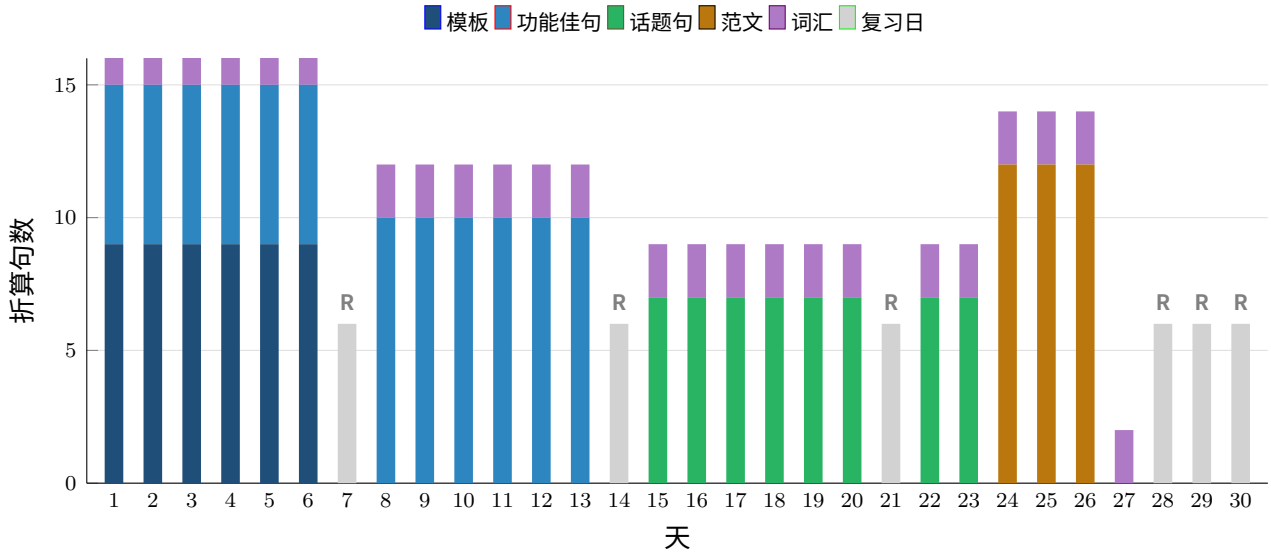

怎么用这本手册：

1. **模板是骨架，佳句是肌肉，话题句是内容。** 先背模板（第 1 周），再背功能佳句（第 2 周），再背话题素材（第 3 周），最后用范文把三者串起来（第 4 周）。
2. **背法：** 先看中文说英文（中译英），说不出再看英文；每条读 3 遍、默写 1 遍。红色方括号 [……] 是需要替换的空位。
3. **复习：** 每日任务表里“复习”一栏按艾宾浩斯间隔（前 1、3、6 个学习日）安排。每周第 7 天只复习不学新内容，并限时写一篇作文。
4. **避免雷同：** 阅卷老师见过太多“万能模板”。每类句子准备 2–3 个备选，考场上换着用；模板只套结构，中间一定写具体的例子。

E1 Traditional Culture Helps Build Cultural Confidence

2026 年 6 月真题第一套话题 · 套用 T3 · 约 180 词

It is universally acknowledged that traditional culture is the root and soul of a nation. In an era of globalization, when various cultures meet and compete, the role of traditional culture in building cultural confidence can never be overemphasized.

To begin with, traditional culture gives us a strong sense of identity. Festivals such as the Spring Festival and arts such as calligraphy remind us who we are and where we come from. Moreover, it provides rich resources for creativity. A case in point is the popularity of museum-inspired cultural products, which have turned ancient patterns into fashionable designs loved by young people. Without such a deep cultural foundation, we would easily lose ourselves in the flood of foreign trends.

Given its importance, how can we make better use of traditional culture? First, schools should offer more courses and activities related to it. Second, the media should tell China's stories in vivid and modern ways. Most importantly, every young person should learn about our heritage with genuine interest. Only when we cherish our past can we walk confidently into the future.

E2 College Students Should Be Well Prepared for Diverse Challenges

2025 年 12 月真题第三套话题 · 套用 T5 · 约 137 词

Nowadays, many freshmen find themselves troubled by the diverse challenges of college life, ranging from heavy academic tasks to complicated relationships. If left unprepared, they may feel lost and anxious, and even fall behind. Therefore, it is high time that we took this issue seriously.

To begin with, students should develop the ability to learn independently, because college study relies far more on self-management than high school does. Furthermore, it is advisable to build a healthy mindset. For instance, regular exercise and open communication with friends can effectively relieve stress. Finally, setting clear goals for each semester also contributes greatly to staying on the right track.

In short, the challenges at college are by no means insurmountable. As long as we prepare ourselves academically, mentally and practically, we will surely turn these challenges into opportunities for growth.

E3 The Importance of Innovation

高频话题 · 套用 T3 · 约 153 词

It goes without saying that innovation plays a vital role in the development of both individuals and nations. Especially in an age of rapid technological change, the significance of innovation can never be overemphasized.

To begin with, innovation is the primary driving force behind social progress. From high-speed railways to mobile payment, innovations have greatly changed the way we live. Moreover, innovation enables individuals to stand out in fierce competition. Those who think creatively are more likely to solve problems that others consider impossible. Without innovation, a nation would stand still and eventually fall behind.

Then how can innovation be encouraged? First, schools should cultivate students' critical thinking instead of focusing only on exam scores. Second, society should tolerate failure, since every breakthrough comes after countless attempts. Most importantly, each of us should keep an open mind and be brave enough to try new things. Only in this way can innovation truly flourish.
